

Vampire ButtLift After-Care Instructions

- Bruising is normal after the Vampire ButtLift. You will feel sore until the bruising resolves. Tylenol®/acetaminophen may be taken for this discomfort.
- Do not use anti-inflammatory pain relievers for 2 weeks, if possible. These include: Aspirin (unless taking for a heart regimen or clotting disorder), Motrin®, ibuprofen, Aleve®, and many prescription arthritis medications.
- Don't expect to see results for about 3 months.
