

Vampire Facelift After-Care Instructions

- Wash the treatment area thoroughly a few hours after treatment using tepid water and a gentle cleanser to remove all serum and other debris such as dried blood. This improves the skin's appearance and allows for better subsequent absorption of the post-procedure PRP.
- Do not apply makeup for at least 24 hours. After 24 hours, mineral makeup may be applied using a CLEAN brush.
- For the first 1–3 days, your skin will be dry and feel tight. Some flaking is normal; frequent use of hydrating products will help alleviate this.
- Use a physical sunscreen daily.
- After 5–7 days, return to your regular skin care products. Vitamin A products are optimal and recommended.
- Tylenol may be taken for discomfort, but avoid anti-inflammatory pain relievers for 2 weeks if possible. These include: Aspirin (unless taking for a heart regimen or clotting disorder), Motrin®, ibuprofen, Aleve®, and many prescription arthritis medications.
- Avoid alcohol based toners/lotions/RetinA/hydroquinone products for 10 days.
- Avoid direct sun exposure for at least 48 hours.
- If PRP was sent home with you, apply it every night for 5 days or until gone. The PRP can be stored at room temperature.

Recovery Timeline: the 3/3/3 RULE

3 Hours: Swelling should start to resolve.

3 Weeks: The procedure begins working; you may see the beginnings of more vibrant skin, skin color and tone may start to improve.

3 Months: The final result of your Vampire Facelift should take shape now. Your skin should appear healthier, more vibrant, plump, and fresher. Tiny lines and wrinkles should be improved from baseline.
